■ **GALLERY PARK BLVD ROADWAY [Plan Review #4]**

TECHNICAL STANDARDS – NEW ROADS:

1. Please add the street names for Streets A-D on all Plan Sheets.
2. Please show the thru egress lane at the intersection of Independence Blvd and Gallery Park Blvd. Currently the egress lanes show a middle lane with a shared left and right turn instead of a combined thru and turn lane.
3. The Residential Cul-De-Sac Detail may not be required for this plan, if so it may be removed or marked with an “X” on the Typical Details sheet.

TECHNICAL STANDARDS – ACCESS (driveway, sidewalk, and sight distance):

4. Please add pedestrian crossing signs at the roundabouts per the MUTCD and SD 11-14 on the striping plan drawing sheets.
5. The first two Crepe Myrtles located in the median section of the 4 way intersections may block adequate sight distance for crossing traffic at the intersection. Please confirm the location of the trees in the median using current AASTHO requirements for a 35 mph roadway.

Please let me know if you have any questions or if I can be of further assistance as this development moves through the review process.
