Sam,

A few comments:

1. Please review the infiltration trench supplements for necessary updating based on the Cultec system.
2. The Cultec plans need to be a part of the approved construction drawings. Please add the 'Approved Construction Plan' and 'Approved Stormwater Management Plan' blocks to each Cultec sheet.
3. We have already spoken about the water quality volume requirements for the infiltration trenches. I am waiting on an answer from you.
4. I also requested the Post 25-year in an earlier email.

Once these items have been addressed and resubmitted to me digitally, please contact Brian Chambers (910-342-2782) with the CoW Planning Department regarding plan sheet submittal requirements to get the approved plan set updated.

Let me know if you have any questions.

Can you send the Post 25-year? It was not included in the drainage report.

Thanks,

Richard Christensen, PE
