

Engineering has reviewed the 11/21/2019 submittal for the Wilmington Treatment Center Phase II project and offers the following comments:

1. All plan sheets should include the Stormwater Management Approval Stamp (cover, survey, C512).
2. Revise the Stormwater Permit Application, Section II, #2. The project is currently covered by an existing City Stormwater Permit. List the current City stormwater permit number: 2017032R2.
3. Engineering has no further comments.
