TRANSMITTAL LETTER

TO: Cynthia Roush, Zoning Enforcement Inspector
DATE: May 24, 2019
SUBJECT: Dawson Street Lofts (2019048)
Release for Grading Purposes Only
Plans Sealed as of 5/6/19

The following items are being sent to you via this package.

QUAN.	DWG./NO.	DESCRIPTION
1	CE-101, CE-102, CD-101, CS-101, CG-101, CE-501 and CG-501	Plans Sealed by Richard M. Collier on 5/6/19 and stamped received by the City on 5/8/19.
1	Dated 8/24/17	Approved Tree Preservation Permit
1	Dated 10/24/14	NCDENR Stormwater Permit No. SWBB 961202
1	Dated 6/29/17	NCDENR Erosion Control Permit No. NEWHA- 2015-011
1	Dated 11/19/02	Policy on the Release of Projects for the Purpose of Clearing and Grading

REMARKS: The Dawson Street Lofts Project, located at 865 & 883 Virgie Rhodes Lane, is hereby conditionally released for **Clearing and Grading Purposes Only**. The following conditions must be satisfied as part of this release:

1. **A PRE-CONSTRUCTION MEETING MUST BE HELD BETWEEN THE SITE CONTRACTOR AND CITY STAFF PRIOR TO ANY GRADING BEGINNING ON THE SITE. FAILURE TO COMPLY WILL RESULT IN IMMEDIATE CIVIL PENALTIES.**
2. **NO CONSTRUCTION OF ANY BUILDING, STRUCTURE, WALL, UTILITIES, INFRASTRUCTURE ETC. OF ANY KIND, INCLUDING FOOTINGS AND BUILDING SLABS, WILL BE PERMITTED UNTIL THE TECHNICAL REVIEW COMMITTEE HAS APPROVED THE FINAL CONSTRUCTION RELEASE.**
3. **ANY TREES AND/OR AREA DESIGNATED TO BE SAVED MUST BE PROPERLY BARRICADED OR MARKED WITH FENCING AND PROTECTED THROUGHOUT CONSTRUCTION TO INSURE THAT NO CLEARING AND GRADING WILL OCCUR IN THOSE AREAS.**
4. **THIS GRADING RELEASE IS GIVEN IN ACCORDANCE WITH THE EROSION CONTROL PLAN APPROVED BY NEW HANOVER COUNTY.**

RECEIVED

MAY 30 2019

PLANNING DIVISION

5. IF THE CONDITIONS LISTED ABOVE ARE VIOLATED; A STOP WORK ORDER WILL BE ISSUED.
6. THE DEVELOPER ASSUMES ALL RISKS AND PENALTIES WITH ANY DELAY OR STOP WORK ORDER ASSOCIATED WITH THE VIOLATION OF THIS RELEASE. BY SIGNING THIS, THE DEVELOPER ACKNOWLEDGES THE CONDITIONS OF THIS RELEASE AND ASSUMES ALL RESPONSIBILITIES AND RISKS ASSOCIATED WITH IT. THE CITY OF WILMINGTON WILL NOT BE HELD LIABLE FOR ANY COSTS ASSOCIATED WITH THE CLEARING AND GRADING RELEASE.

RE: The Dawson Street Lofts Project, located at 865 & 883 Virgie Rhodes Lane

I have attached a copy of the release for grading for The Dawson Street Lofts Project, located at 865 & 883 Virgie Rhodes Lane dated sealed on plans as of 5/6/19. **Please make note of the conditions for the release as they appear on the attached release letter.** These conditions must be followed and met in order for the construction to be approved. ***Prior to beginning grading on the site, you must have a pre-construction meeting between City staff and the project's representatives. Any violation of this condition will result in an immediate stop work order and other civil penalties.***

All grading on the site must be in accordance with New Hanover County erosion control standards and the erosion control plan approved by New Hanover County and the City of Wilmington. Any trees and areas designated to be saved or protected must be properly barricaded and/or marked throughout construction. In addition please be aware that no construction of buildings, structures, walls, etc. may begin until the City of Wilmington's Technical Review Committee has approved the final plans and final construction release is granted.

Please contact our office at 254-0900 if you have any questions or concerns regarding this information and to schedule a pre-construction meeting with City staff. The City thanks you for your investment in our community and looks forward to working with you towards construction of a quality development project.

Sincerely,

A handwritten signature in blue ink that reads "Nicole D. Smith".

**LETTER OF APPROVAL WITH MODIFICATIONS
AND PERFORMANCE RESERVATIONS**

Wilmington Housing Authority, NC
Katrina H. Redmon
1524 S. 16th St
Wilmington, NC 28401

RE: Project Name: **JERVAY HOUSE II/ DAWSON STREET LOFTS**
Acres Approved: 3.0
Project ID: **NEWHA-2015-011**
County: New Hanover, City: Wilmington
Address: 1524 S 16th St.
River Basin: Cape Fear
Stream Classification: Other
Submitted By: Eric Seidel, PE
Date Received by LQS: 6/19/2017
Plan Type: Residential

Dear Ms. Redmon:

This office has reviewed the subject erosion and sedimentation control plan. We find the plan to be acceptable and hereby issue this Letter of Approval. The enclosed Certificate of Approval must be posted at the job site. This plan approval shall expire three (3) years following the date of approval, if no land-disturbing activity has been undertaken, as is required by Title 15A NCAC 4B .0129.

Please be aware that your project will be covered by the enclosed NPDES Construction Stormwater General Permit NCG010000. Please become familiar with all the requirements and conditions of this permit in order to achieve compliance.

Letter of Approval
Katrina H. Redmon
June 29, 2017
Page 2 of 4

Title 15A NCAC 4B .0118(a) requires that a copy of the approved erosion control plan be on file at the job site. Also, this letter gives the notice required by G.S. 113A-61.1(a) of our right of periodic inspection to insure compliance with the approved plan.

North Carolina's Sedimentation Pollution Control Act is performance-oriented, requiring protection of existing natural resources and adjoining properties. If, following the commencement of this project, the erosion and sedimentation control plan is inadequate to meet the requirements of the Sedimentation Pollution Control Act of 1973 (North Carolina General Statute 113A-51 through 66), this office may require revisions to the plan and implementation of the revisions to insure compliance with the Act.

Acceptance and approval of this plan is conditioned upon your compliance with Federal and State water quality laws, regulations, and rules. In addition, local city or county ordinances or rules may also apply to this land-disturbing activity. This approval does not supersede any other permit or approval.

Please note that this approval is based in part on the accuracy of the information provided in the Financial Responsibility Form, which you provided. You are requested to file an amended form if there is any change in the information included on the form. In addition, it would be helpful if you notify this office of the proposed starting date for this project. Please notify us if you plan to have a preconstruction conference.

Your cooperation is appreciated.

Sincerely,

Carol Miller, CPESC
Regional Engineering Associate
Land Quality Section

Enclosures: Certificate of Approval

MODIFICATIONS AND PERFORMANCE RESERVATIONS

Project Name: JERVAY HOUSE II/ DAWSON STREET LOFTS
Project ID: NEWHA-2015-011
County: New Hanover

1. This plan approval shall expire three (3) years following the date of approval, if no land disturbing activity has been undertaken, as is required by Title 15A NCAC 4B .0129.
2. The developer is responsible for the control of sediment on-site. If the approved erosion and sedimentation control measures prove insufficient, the developer must take those additional steps necessary to stop sediment from leaving this site (NCGS 113A-57(3)). Each sediment storage device must be inspected after each storm event (NCGS 113A-54.1(e)). Maintenance and/or clean out is necessary anytime the device is at 50% capacity. All sediment storage measures will remain on site and functional until all grading and final landscaping of the project is complete (15A NCAC 04B .0113).
3. Any and all existing ditches on this project site are assumed to be left undisturbed by the proposed development unless otherwise noted. The removal of vegetation within any existing ditch or channel is prohibited unless the ditch or channel is to be regarded with side slopes of 2 horizontal to 1 vertical or less steep (15A NCAC 04B .0124 (d)). Bank slopes may be mowed, but stripping of vegetation is considered new earth work and is subject to the same erosion control requirements as new ditches (NCGS 113A-52(6)).
4. The developer is responsible for obtaining any and all permits and approvals necessary for the development of this project prior to the commencement of this land disturbing activity. This could include our agency's Stormwater regulations and the Division of Water Resources' enforcement requirements within Section 401 of the Clean Water Act, the U.S. Army Corps of Engineers' jurisdiction of Section 404 of the Clean Water Act, the Division of Coastal Management's CAMA requirements, the Division of Solid Waste Management's landfill regulations, the Environmental Protection Agency and/or The U.S. Army Corps of Engineers jurisdiction of the Clean Water Act, local County or Municipalities' ordinances, or others that may be required. This approval cannot supersede any other permit or approval; however, in the case of a Cease and Desist Order from the Corps of Engineers, that Order would only apply to wetland areas. All highland would still have to be in compliance with the N.C. Sedimentation Pollution Control Act.
5. If any area on site falls within the jurisdiction of Section 401 or 404 of the Clean Water Act, the developer is responsible for compliance with the requirements of the Division of Water Resources (DWR), the Corps of Engineers and the Environmental Protection Agency (EPA) respectively. Any erosion control measures that fall within jurisdictional wetland areas must be approved by the aforementioned agencies prior to installation. The Land Quality Section must be notified of a relocation of the measures in question to the transition point between the wetlands and the uplands to assure that

the migration of sediment will not occur. If that relocation presents a problem or contradicts any requirements of either DWR, the Corps, or the EPA, it is the responsibility of the developer to inform the Land Quality Section regional office so that an adequate contingency plan can be made to assure sufficient erosion control remains on site. Failure to do so will be considered a violation of this approval (NCGS 113A-54.1(b)).

6. Any borrow material brought onto this site must be from a legally operated mine or other approved source. Any soil waste that leaves this site can be transported to a permitted mine or separately permitted construction sites without additional permits under NCGS 74-49(7)(d). Disposal at any other location would have to be included as a permit revision for this approval.

7. This permit allows for a land disturbance, as called for on the application plan, not to exceed 3.0 acres. Exceeding that acreage will be a violation of this permit and would require a revised plan and additional application fee. Any addition in impervious surface, over that already noted on the approved plan, would also require a revised plan to verify the appropriateness of the erosion control measures and stormwater retention measures (NCGS 113A-54.1(b)).

8. The construction detail for the proposed silt fence requires reinforcing wire and steel posts a maximum of eight (8) feet apart. Omission of the reinforcing wire is a construction change that necessitates more posts for support, i.e., the spacing distance needs to be reduced to no greater than six (6) feet apart (E&SC Planning & Design Manual 6.63, Rev. 6/06).

9. A graveled construction entrance must be located at each point of access and egress available to construction vehicles during the grading and construction phases of this project. Access and egress from the project site at a point without a graveled entrance will be considered a violation of this approval. Routine maintenance of the entrances is critical (113A-54.1(b)).

10. As a condition of the provided NPDES General Stormwater Permit (NCG010000), groundcover stabilization must meet specific time frames. Slopes (including cuts, fills, and ditch banks) that are steeper than 3 horizontal to 1 vertical left exposed will, within seven (7) calendar days after completion of any phase of grading, be provided with groundcover. Slopes that are 3 horizontal to 1 vertical or flatter will be provided with groundcover within fourteen (14) calendar days.

11. As a part of routine monitoring of the approved land-disturbing activity, the financially responsible party shall assure inspections of the area covered by the approved plan after each phase of the plan has been completed and after establishment of temporary ground cover in accordance with North Carolina General Statute 113A 54.1(e).

Ms. Katrina H. Redmon, CEO
Wilmington Housing Authority
1524 South 16th Street
Wilmington, NC 28401

**Subject: State Stormwater Management Permit No. SW8 981202
Jervay Place and Dawson Street Lofts
High Density Subdivision Infiltration Trench Project
New Hanover County**

Dear Ms. Redmon:

The Wilmington Regional Office received a complete, modified Stormwater Management Permit Application for Jervay Place and Dawson Street Lofts on October 23, 2014. Staff review of the plans and specifications has determined that the project, as proposed, will comply with the Stormwater Regulations set forth in Title 15A NCAC 2H.1000 and Session Law 2008-211, as applicable. We are forwarding Permit No. SW8 981202, dated October 24, 2014, for the construction, operation and maintenance of the BMP's and built-upon areas (BUA) associated with the subject project.

This permit shall be effective from the date of issuance until July 1, 2022, and shall be subject to the conditions and limitations as specified therein. Please pay special attention to the conditions listed in this permit regarding the Operation and Maintenance of the BMP(s), recordation of deed restrictions, certification of the BMP's, procedures for changes of ownership, transferring the permit, and renewing the permit. Failure to establish an adequate system for operation and maintenance of the stormwater management system, to record deed restrictions, to certify the BMP's, to transfer the permit, or to renew the permit, will result in future compliance problems.

The following modifications are included and covered by this permit:

1. The construction of two multi-family residential developments, Jervay House II and Dawson Street Lofts, along Dawson Street between 8th and 10th Streets.
2. This construction increases the drainage area and impervious area associated with infiltration trench
4. An expansion of this trench is proposed to handle the additional volume.
3. Clarification on the amount of built-upon area constructed for this project using as-built surveys.
4. Clarification of the infiltration trench designs.

If any parts, requirements, or limitations contained in this permit are unacceptable, you have the right to request an adjudicatory hearing by filing a written petition with the Office of Administrative Hearings (OAH). The written petition must conform to Chapter 150B of the North Carolina General Statutes, and must be filed with the OAH within thirty (30) days of receipt of this permit. You should contact the OAH with all questions regarding the filing fee (if a filing fee is required) and/or the details of the filing process at 6714 Mail Service Center, Raleigh, NC 27699-6714, or via telephone at 919-431-3000, or visit their website at www.NCOAH.com. Unless such demands are made this permit shall be final and binding.

If you have any questions, or need additional information concerning this matter, please contact Christine Nelson in the Wilmington Regional Office, at (910) 796-7215.

Sincerely,

Tracy Davis, P.E., Director
Division of Energy, Mineral and Land Resources

STATE STORMWATER MANAGEMENT PERMIT
HIGH DENSITY SUBDIVISION INFILTRATION TRENCH DEVELOPMENT

In accordance with the provisions of Article 21 of Chapter 143, General Statutes of North Carolina as amended, and other applicable Laws, Rules, and Regulations

PERMISSION IS HEREBY GRANTED TO

Wilmington Housing Authority
Jervay Place and Dawson Street Lofts
Virgil Rhodes Ln, Wilmington, New Hanover County

FOR THE

construction, operation and maintenance of four (4) infiltration trenches in compliance with the provisions of Session Law 2008-211 and 16A NCAC 2H .1000, as applicable, (hereafter jointly and individually referred to as the "stormwater rules") and the approved stormwater management plans and specifications and other supporting data as attached and on file with and approved by the Division and considered a part of this permit.

This permit shall be effective from the date of issuance until July 1, 2022 and shall be subject to the following specified conditions and limitations:

I. DESIGN STANDARDS

1. This permit is effective only with respect to the nature and volume of stormwater described in the application and other supporting data.
2. This stormwater system has been approved for the management of stormwater runoff as described in Section I.8 of this permit. The subdivision is permitted for a variety of housing including 38 single family and duplex lots and 6 lots containing multifamily housing. Each lot is allowed a maximum amount of built-upon area (BUA) as listed in Attachment A of this permit.
3. The tract will be limited to the amount of built-upon area indicated in Sections I.2 and I.6 of this permit, and as shown on the approved plans. The built-upon area for the future development within Drainage Area 4 is limited to 1,500 square feet. There is no allocation of future built-upon area within Drainage Areas 1, 2, or 3.
4. The previously approved four infiltration trenches have been designed with bypasses to treat the stormwater runoff.
5. All stormwater collection and treatment systems must be located in either public rights-of-way or dedicated common areas or recorded drainage easements. The final plats for the project will be recorded showing all such required rights-of-way, common areas and easements, in accordance with the approved plans.
6. The project shall provide and maintain a 50-foot-wide buffer adjacent all surface waters, measured horizontally from and perpendicular to the normal pool of impounded structures, the top of bank of both sides of streams and rivers, and the mean high water line of tidal waters.

7. The runoff from all built-upon area within the permitted drainage area of this project must be directed into the permitted stormwater control system.
8. The following design criteria have been approved for these infiltration trench systems and must be provided and maintained at this design condition:

	1	2	3	4
a. Drainage Area, acres:	2.98	2.35	4.02	5.34
Onsite, subject to 1995 Rules, ft ² :	103,544	102,516	175,018	201,538

*These infiltration trenches have been modified and expanded from the original design approved in 2002 resulting in each expanded section having slightly different specifications. Each section of the infiltration trench is being described to improve accuracy and provide clarification.

II. SCHEDULE OF COMPLIANCE

1. The permittee shall not alter any aspect or any component of the approved stormwater drainage and collection system, or pipe any ditches or swales shown on the approved plans, except for a minimum driveway pipe, unless and until the permittee shall have submitted a modification to the permit and received approval from the Division. Additionally, no homeowner, lot owner, builder or developer shall to alter any aspect or any component of the approved stormwater collection system or to pipe any ditches or swales shown on the approved plans, except for minimum driveway crossings, unless and until the permittee shall have submitted a revision to the permit and received approval from the Division.
2. The permittee shall routinely monitor the project to ensure that the proposed built-upon area for the entire project including lot BUA, streets, recreation facilities and sidewalks, does not exceed the permitted maximum allowable built-upon area and the maximum BUA within each drainage area as described in Section 1.8. Where the permittee finds a noncompliance with the permit on an individual lot, the permittee shall notify the lot owner in writing, requiring remediation of the noncompliance within a reasonable time frame, and shall follow-up to ensure that the noncompliance has been resolved.
3. The permittee is responsible for approving and monitoring all driveway pipe installation on individual lots. The permittee shall assure that all piping shall be that minimum amount and diameter necessary to adequately pass the drainage underneath the driveway, while maintaining a 3:1 side slope.
4. The permittee shall not approve any lot plan where the permitted maximum BUA limit is exceeded, or where piping of ditches or swales is proposed, or where excessive driveway piping is proposed, without first submitting a permit modification and receiving approval from the Division.
5. The Director may notify the permittee when the permitted site does not meet one or more of the minimum requirements of the permit. Within the time frame specified in the notice, the permittee shall submit a written time schedule to the Director for modifying the site to meet minimum requirements. The permittee shall provide copies of revised plans and certification in writing to the Director that the changes have been made.
6. The permittee shall submit to the Director and shall have received approval for revised plans, specifications, and calculations prior to construction, for any modification to the approved plans, including, but not limited to, those listed below:
 - a. Any revision to any item shown on the approved plans, including the stormwater management measures, built-upon area, details, etc.
 - b. Redesign or addition to the approved amount of built-upon area or to the drainage area.
 - c. Further development, subdivision, acquisition, lease or sale of any, all or part of the project area.
 - d. Filling in, altering, or piping of any vegetative conveyance shown on the approved plan.
 - e. The construction of any future BUA listed on the application.
7. The Director may determine that other revisions to the project should require a modification to the permit.
8. The stormwater management system shall be constructed in its entirety, vegetated and operational for its intended use prior to the construction of any built-upon surface.

9. During construction, erosion shall be kept to a minimum and any eroded areas of the system will be repaired immediately. Infiltration systems should not be used as erosion control devices, due to the potential clogging. If the stormwater system was used as an Erosion Control device, it must be restored to design condition prior to operation as a stormwater treatment device, and prior to occupancy of the facility.
10. Upon completion of construction, prior to issuance of a Certificate of Occupancy, and prior to operation of this permitted facility, the permittee shall cause a certification from an appropriate designer for the system installed, to be submitted, certifying that the permitted facility has been installed in accordance with this permit, the approved plans and specifications, and other supporting documentation. Any deviations from the approved plans and specifications must be noted on the Certification.
11. The permittee shall at all times provide the operation and maintenance necessary to assure that all components of the permitted stormwater system function as designed. The approved Operation and Maintenance Agreement must be followed in its entirety and maintenance must occur at the scheduled intervals listed in the O&M Agreement.
12. Records of maintenance activities must be kept and made available upon request to authorized personnel of DENR. The records will indicate the date, activity, name of person performing the work and what actions were taken.
13. Prior to the sale of any lot, the following deed restrictions must be recorded:
 - a. The following covenants are intended to ensure ongoing compliance with State Stormwater Management Permit Number SW8 961202, as issued by the Division under NCAC 2H.1000.
 - b. The State of North Carolina is made a beneficiary of these covenants to the extent necessary to maintain compliance with the Stormwater Management Permit.
 - c. These covenants are to run with the land and be binding on all persons and parties claiming under them.
 - d. The covenants pertaining to stormwater may not be altered or rescinded without the express written consent of the State of North Carolina.
 - e. Alteration of the drainage as shown on the approved plans may not take place without the concurrence of the Division.
 - f. The maximum built-upon area per lot is as described in Attachment A. This allotted amount includes any built-upon area constructed within the lot property boundaries, and that portion of the right-of-way between the front lot line and the edge of the pavement. Built upon area includes, but is not limited to, structures, asphalt, concrete, gravel, brick, stone, slate, coquina and parking areas, but does not include raised, open wood decking, or the water surface of swimming pools.
 - l. All runoff from the impervious surfaces on the lot must drain into the permitted system. This may be accomplished through providing roof drain gutters which drain to the street, grading the lot to drain toward the street, or grading perimeter swales and directing them into the pond or street. Lots that will naturally drain into the system are not required to provide these measures.
 - l. Each multifamily, community, or common area lot within the subdivision whose ownership is not retained by the permittee, must submit a separate Offsite Stormwater Management Permit application package to the Division of Energy, Mineral and Land Resources and receive a permit prior to any construction on the lot.
14. A copy of the recorded deed restrictions must be submitted to the Division within 30 days of the date of recording the plat, and prior to selling lots. The recorded copy must contain all of the statements above, the signature of the Permittee, the deed book number and page, and the stamp/signature of the Register of Deeds.

15. Prior transfer of the permit, the stormwater facilities must be inspected by the Division and must be in compliance with all permit conditions. Any items not in compliance must be repaired or replaced to design condition prior to the transfer. Records of maintenance activities performed to date will be required.
16. This permit shall become voidable unless the facilities are constructed in accordance with the conditions of this permit, the approved plans and specifications, and other supporting data.

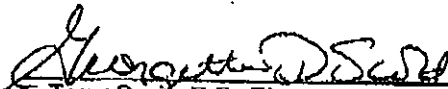

III. GENERAL CONDITIONS

1. This permit is not transferable to any person or entity except after notice to and approval by the Director. The permittee shall submit a completed and signed Name/Ownership Change Form, accompanied by the supporting documentation as listed on the form, to the Division at least 60 days prior to any one or more of the following events:
 - a. An ownership change including the sale or conveyance of the project area in whole or in part, except in the case of an individual lot sale that is made subject to the recorded deed restrictions;
 - b. The sale or conveyance of the common areas to a Homeowner's or Property Owner's Association, subject to the requirements of Session Law 2011-256;
 - c. Bankruptcy;
 - d. Foreclosure;
 - e. Dissolution of the partnership or corporate entity;
 - f. A name change of the current permittee;
 - g. A name change of the project;
 - h. A mailing address change of the permittee;
2. The permittee is responsible for compliance with all of the terms and conditions of this permit until such time as the Director approves the transfer request.
3. Any individual or entity found to be in noncompliance with the provisions of this stormwater management permit or the requirements of the Stormwater Rules is subject to enforcement procedures as set forth in G.S. 143 Article 21.
4. Unless specified elsewhere, permanent seeding requirements for the stormwater control must follow the guidelines established in the North Carolina Erosion and Sediment Control Planning and Design Manual.
5. The issuance of this permit does not preclude the Permittee from complying with any and all statutes, rules, regulations, or ordinances which may be imposed by other government agencies (local, state, and federal) which have jurisdiction.
6. In the event that the facilities fail to perform satisfactorily the Permittee shall take immediate corrective action, including those as may be required by this Division, such as the construction of additional or replacement stormwater management systems.
7. The permit issued shall continue in force and effect until revoked or terminated. The permit may be modified, revoked and reissued or terminated for cause. The filing of a request for a permit modification, revocation and reissuance or termination does not stay any permit condition.
8. The Permittee grants permission to staff of the DENR to access the property for the purposes of inspecting the stormwater facilities during normal business hours.

9. Approved plans, supplement forms, O&M Agreements and specifications for this project are incorporated by reference and are enforceable parts of the permit. A copy of this permit, the supplement forms, the Operation and Maintenance Agreements, and the approved plans and specifications shall be maintained on file by the Permittee at all times.
10. The permittee shall submit a permit renewal application at least 180 days prior to the expiration date of this permit. The renewal application shall include the required application, appropriate application fee and documentation.

Permit modified and reissued this the 24th day of October 2014.

NORTH CAROLINA ENVIRONMENTAL MANAGEMENT COMMISSION

Tracy Davis, P.E., Director
Division of Energy, Mineral and Land Resources

I, _____, as a duly registered _____ in the State of North Carolina, having been authorized to observe (periodically/weekly/full time) the construction of the project,

for _____ (Project Owner) hereby state that, to the best of my abilities, due care and diligence was used in the observation of the project construction such that the construction was observed to be built within substantial compliance and intent of the approved plans and specifications.

Noted deviations from approved plans and specifications:

SEAL

Date _____

Certification Requirements:

Page 2 of 2

- ____ 1. The drainage area to the system contains approximately the permitted acreage.
- ____ 2. The drainage area to the system contains no more than the permitted amount of built-upon area.
- ____ 3. All the built-upon area associated with the project is graded such that the runoff drains to the system.
- ____ 4. All roof drains are located such that the runoff is directed into the system.
- ____ 5. The outlet/bypass structure elevations are per the approved plan.
- ____ 6. The outlet structure is located per the approved plans.
- ____ 7. Trash rack is provided on the outlet/bypass structure.
- ____ 8. All slopes are grassed with permanent vegetation.
- ____ 9. Vegetated slopes are no steeper than 3:1.
- ____ 10. The inlets are located per the approved plans and do not cause short-circuiting of the system.
- ____ 11. The permitted amounts of surface area and/or volume have been provided.
- ____ 12. All required design depths are provided.
- ____ 13. All required parts of the system are provided, such as a vegetated shelf, a forebay, and the level spreader / vegetated filter strip.
- ____ 14. The required dimensions of the system are provided, per the approved plan.

**POLICY ON THE RELEASE OF PROJECTS FOR THE PURPOSE
OF CLEARING AND GRADING**

No release of projects for the purpose of clearing and grading will be approved except under the following circumstances:

1. Any applications for State permits, including those for driveways, stormwater, water extensions and sewer extensions, CAMA, etc. must have been applied for and received by the applicable State agency. The application must have been submitted to the applicable State agency for a time period exceeding the minimum review time of such applicable agency, indicating a delay by the State agency in the review of the application. Evidence that the applicable State agencies will issue the permit as submitted shall be provided by the applicant or the clearing and grading release will not be issued.
2. If wetlands exist on the site, no clearing and grading release of the project will occur until all reviewing agencies have completed their review, approved the plan and issued the wetland permit. Any and all wetland permits shall be submitted to and received by the City of Wilmington prior to the clearing and grading release of a project.
3. If a project is released for clearing and grading, then the release shall be for clearing and grading only and subject to the limits as authorized by the approved erosion control plan. However, no walls, utilities, infrastructure, structure (including footings), etc. shall be constructed.
4. If the conditions listed above are violated, a stop work order shall be issued.
5. Pre-construction meetings shall be held with the applicant and city staff to discuss the limits of the conditional approval, construction entrance driveways, tree preservation/removal, and any other issue of concern that staff and/or the developer may have. The Technical Review Committee meeting is not a pre-construction meeting.
6. The developer assumes all risks and penalties with any delay or stop work order associated with the violation of this policy. An indemnification statement shall be placed on each release to guarantee that the City of Wilmington will not be held liable for any costs associated with the clearing and grading release.
7. The applicant will sign the clearing and grading release to acknowledge that he/she understands the conditions and risks associated with the release.
8. No partial release for clearing and grading release will be granted for any applicant that has violated these conditions during a twelve month time period from the date of request for clearing and grading release.

Approved this 19th day of November, 2002:
